

The logo for 'EL-FISH' is rendered in a white, stylized, blocky font. The letters are contained within a dark purple, irregularly shaped banner that has a slightly wavy, torn-edge appearance. The background of the entire cover is a vibrant blue with white, wavy lines representing water. Various colorful fish are scattered throughout: a large pink and blue striped fish in the lower left, a green and blue striped fish in the center, a red and blue striped fish in the lower right, and several smaller fish in shades of blue, green, and orange. A large, stylized blue fish is visible in the upper right corner. The overall aesthetic is that of a classic 1990s computer game box art.

EL-FISH™

THE ELECTRONIC AQUARIUM

You've seen fish on a computer before...But you've never seen fish this bright, this beautiful, this colorful—or this realistic. And with El-Fish you can breed and evolve new, never-before-seen fish—and keep them in aquariums that you design and create. Combining art, science, technology and life, El-Fish is the creative tool to make living art.

Catch, breed and evolve your fish—then the computer animates them!

Choose from dozens of aquarium backgrounds and bottoms.

Assorted silly animations add a humorous touch to your tank.

Create aquariums to suit your taste and temperament.

Grow plants, add rocks, shells and other stationary objects.

Add animated objects like crabs and divers—then you're ready for fish...

Fish In Chips — No drawing or painting skills needed. All fish and their animations are created by your computer using the latest techniques in Artificial Life, genetic algorithms and 3-D image rendering.

Tanks A Lot — Catch, breed, evolve, mutate and animate unlimited fish to create unlimited aquariums.

Zen And The Art Of Electronic Fish — Creating and watching El-Fish aquariums evokes the same relaxing, meditative, contemplative, blood pressure-lowering moods as a real aquarium.

From Russia With Glub — Created and programmed in Russia by AnimaTek, El-Fish continues Maxis' international quest to bring you the best, most creative entertainment software in the world.

- Compose animated shows of multiple tanks.
- Grow computer-generated plants.
- Computer-generated soundtracks in eight styles.
- No spills, no odors, no tanks to clean and no dead fish.
- Import your own drawings, pictures and scans into aquariums.
- Your only limit is your imagination.
