## Macintosh

"Expert Home Design offers the user an appealing combination of features: **ease of use, well integrated design and performance** for creating precise interior design layouts **at an unbeatable price**"  
**MACWORLD 5/93**

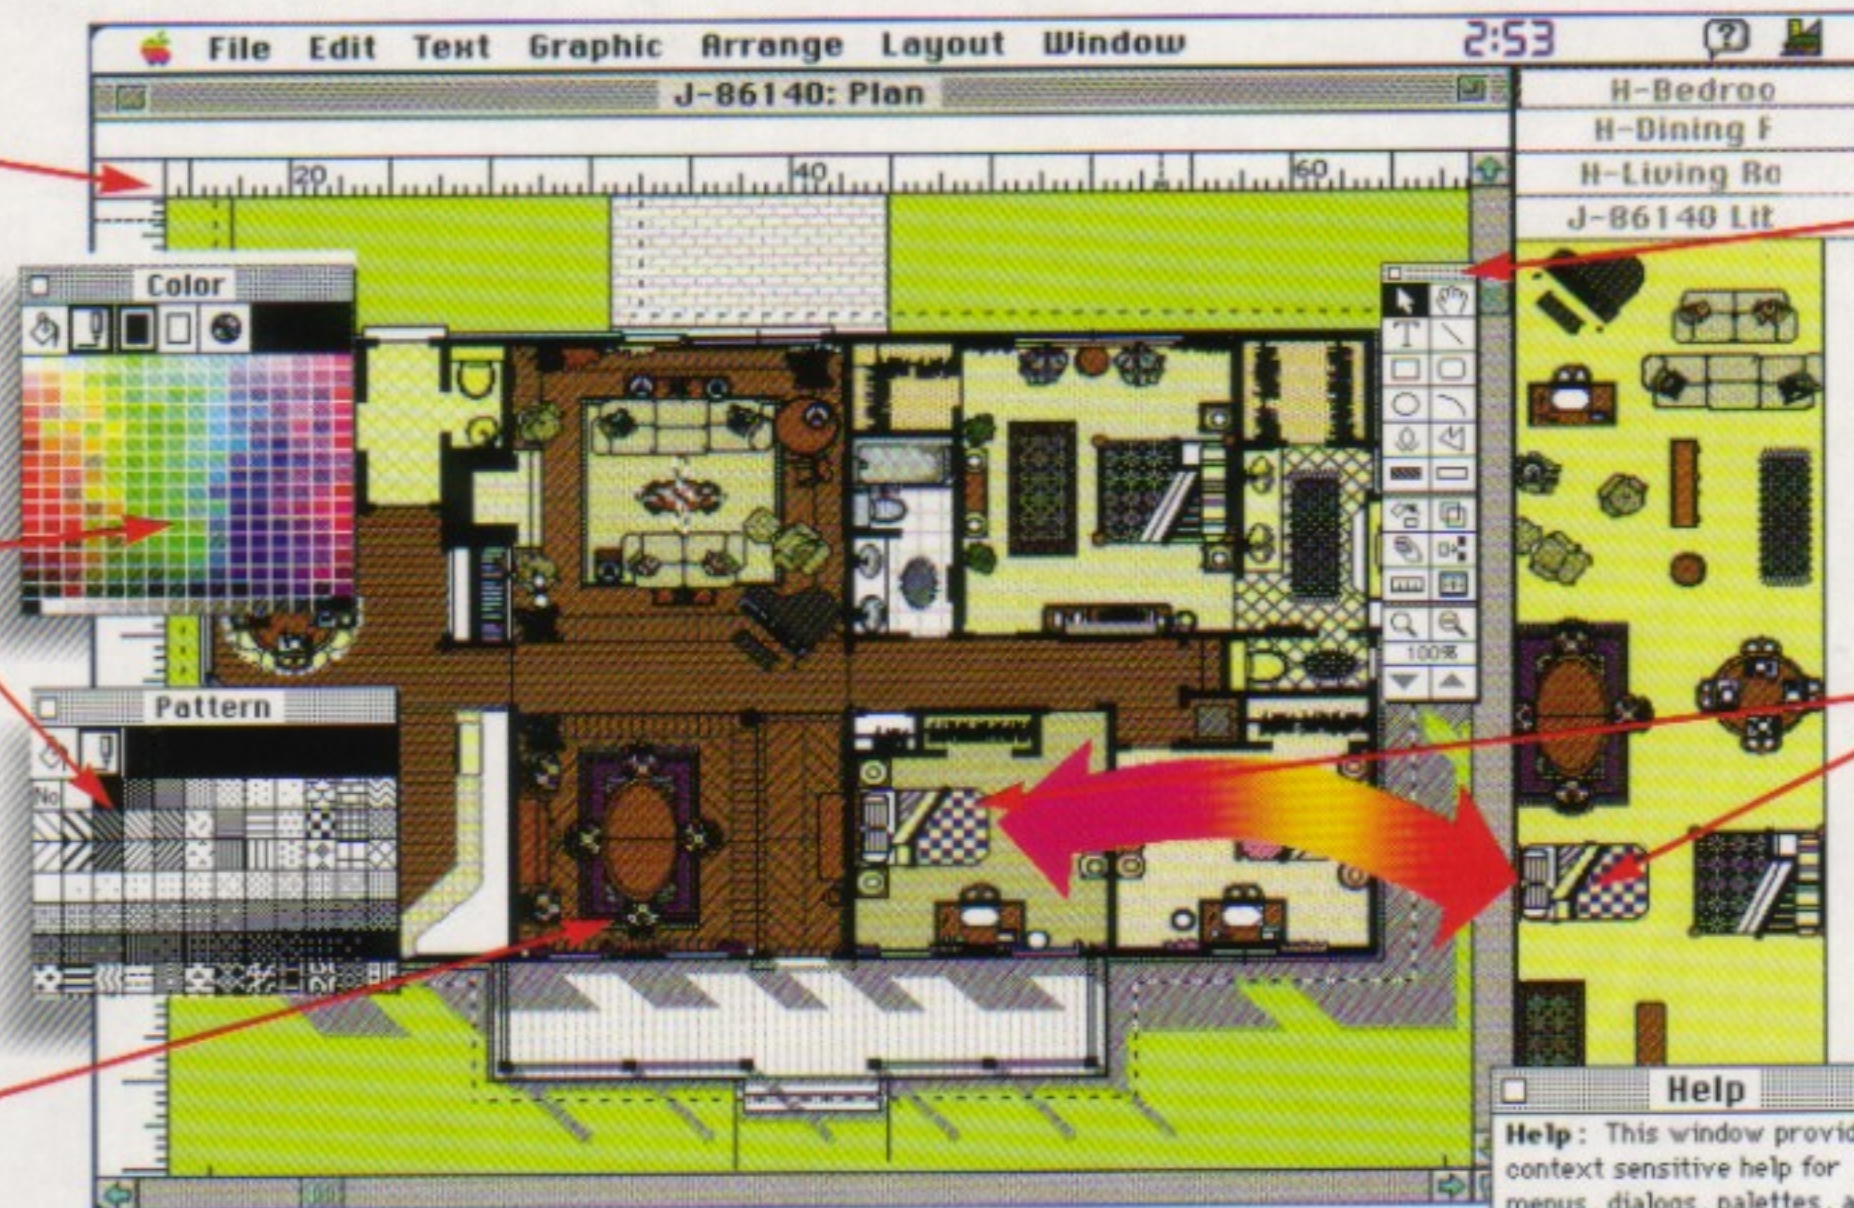

# EXPERT Home Design™

## Be Your Own Interior Designer!

Rulers can be set to either English or Metric units to help you draw precise plans

Customize your furniture, carpet, and floor textures by using over 140 patterns and millions of colors.

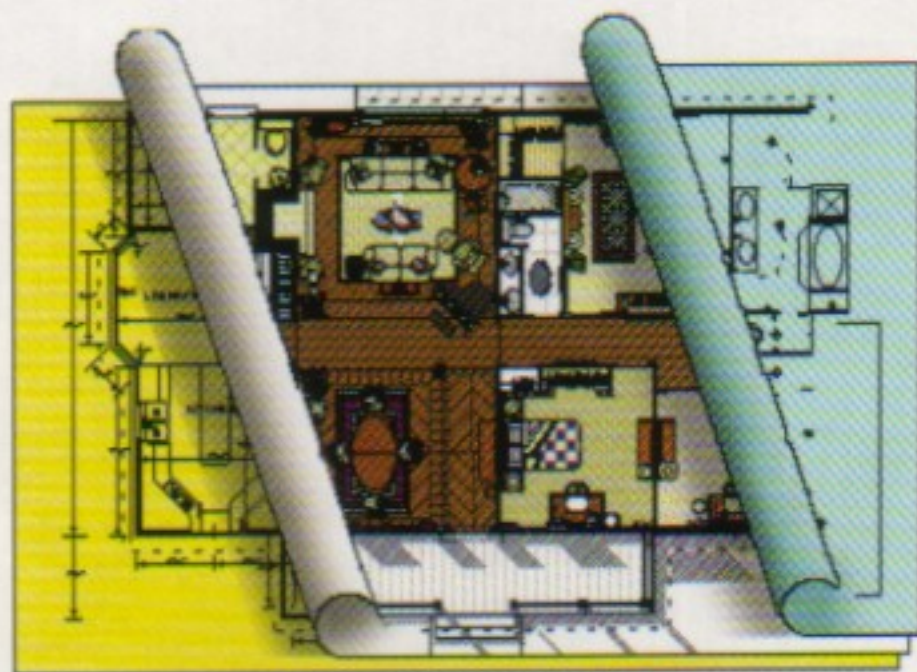

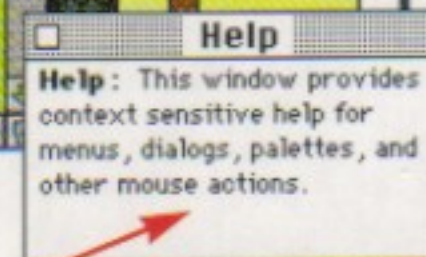

Choose from over 200 detailed furniture pieces, kitchen and bathroom fixtures, and office equipment. Or draw your own and save them in custom libraries.

Quickly select the right tool for drawing and manipulating any part of your plan. The toolbox even includes specialized tools for drawing walls and windows.

Drag objects from any library and drop them into your layout. They will automatically re-size to match the layout's scale.

The intelligent, context-sensitive help system answers questions relating to your current action and location of your mouse pointer.

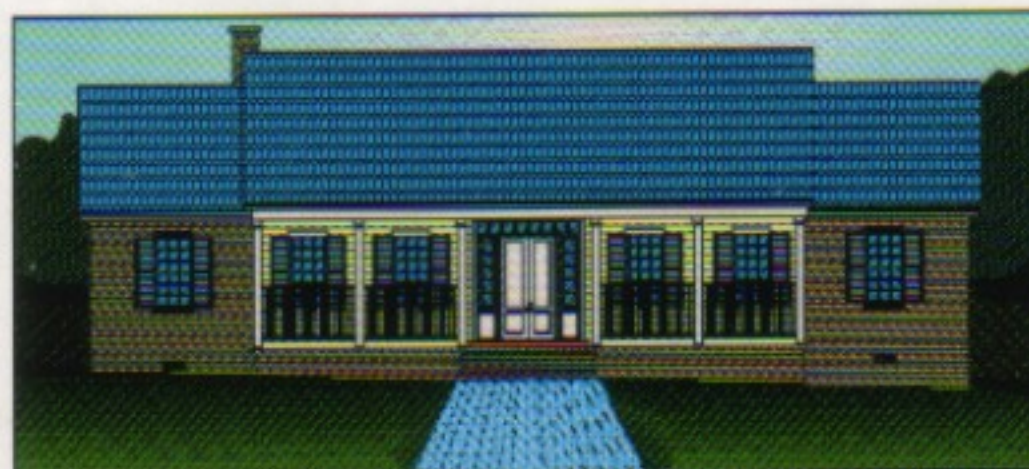

Make it easier to work with your plan by drawing different parts, such as furniture or wiring, onto separate transparent pages called **Layers**. For example, hide your furniture layer while you create your carpet layer, then re-display the furniture on top of the new carpet.

### Powerful

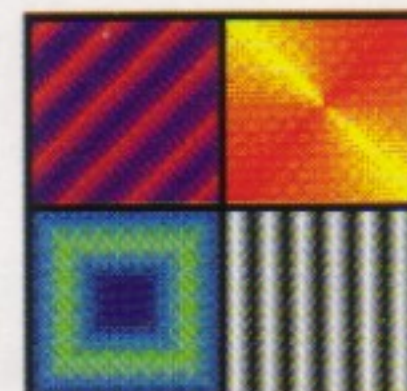

- ✓ Print your color layout at 100% to scale on multiple sheets of paper or even reduce the scale to fit on one sheet.
- ✓ It's easy to use artwork from other programs by importing a PICT or Paint file. You can also export your layout as a PICT file.
- ✓ Write a letter in your word processor and easily include your Home Design floor plan. If you change the plan, Publish & Subscribe (System 7) automatically updates your letter.

### Flexible

- ✓ Zoom-in to work on details. Zoom-out to see the big picture.
- ✓ Enhance your layout with text of any size, font, and color.

With the variety of **Drawing Tools** you can create drawings like this.

Create a wide variety of impressive visual effects from 5 **Gradient** styles.

Built-in **QuickTime** lets you play video clips while you draw your plan.

### Easy-To-Use

- ✓ No experience necessary

### Precise

- ✓ Automatically display dimensions of objects as you draw or resize them.
- ✓ Maintain full control over objects: flip, rotate, group, align, scale them and more.
- ✓ Nudge objects into precise placement using the Arrow keys.
