## Quest

by Patrick Buckland  
© GREENE, INC.

**Crystal Quest is a fast moving, adrenalin-boiling video arcade game.** The sounds are fun, the action is fast, and the excitement is what draws you back again and again!

**Your job is to collect all the crystals,** avoid all the mines, bullets, and 12 different sorts of nasties that will be out to get you in over 40 different waves of action. There are nasties that gush bullets like hailstorms, nasties that stalk you, nasties that fire laser beams at you, nasties that refuse to die... What do you mean that isn't very fair? It's extremely fair. It's a very nasty game!

**Requirements:** Macintosh Plus, Macintosh SE, or Mac II. Hard disk is recommended.

## CRITTEREDITOR™

**Create your own games!**

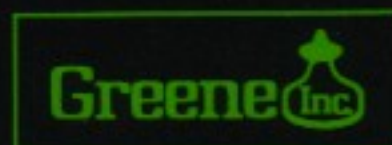

**You can change over 1000 parts of Crystal Quest with CritterEditor!**

**Change:** Graphics • Sound • Point Values • Strategies  
Colors • Difficulty • Critter Personalities • Animation  
Verbal Expressions • Shot Speed • Fire Rate • Direction  
Changes • Avoidance Speed • Ship • Hits Needed  
Homing Instinct • Wave Data

**CritterEditor gives you power** to create your own style of arcade game. Master the Toolkit and you have in your hands a graphics editor, sound editor, and the import and export capability to *Change the World of Crystal Quest*.

**The possibilities are almost frightening!** For those of you who have just returned from the Crystal Quest Rehabilitation Center we offer this warning: let someone know where you are when you start—otherwise they might not find you for weeks! On the other hand, it might be cheaper than therapy.
