## SETTING UP — MAC OS

### Automatic Installation

Double-click on the Painters Painting Installer icon to automatically install the *Painters Painting* program and the necessary extensions onto your computer. The installer will copy the program onto the root level of your hard drive or allow you to select/create a folder in which to copy the program.

### Manual Installation

You can manually install the program and extensions by following the instructions below. These instructions assume a basic familiarity with Macintosh interface conventions. If you're just getting started with your computer and find the operations described below confusing, please refer to the documentation that came with your computer.

To manually install this title, follow these steps:

1. Drag the *Painters Painting* icon from the CD to your hard drive.

2. Open the System Extensions folder on the CD to show the extensions necessary or recommended for use with this title.
3. If you don't already have these extensions installed, or are unsure, drag the appropriate icons one-by-one to your System Folder icon and drop them there. The Macintosh will guide you through the rest of the installation. If you install any extensions, restart your computer to make them active. If you have an older version of QuickTime already installed, you will need to manually delete this extension before installing the new version.

## **GETTING STARTED — MAC OS**

To launch the program double-click the *Painters Painting* icon in the *Painters Painting* folder on your hard disk.
